AttendIQ

Smart Attendance Dashboard

A role-based attendance management system with analytics, smart alerts, and demo-ready credentials 4 built for students and administrators.

What Is AttendIQ?

AttendIQ is a comprehensive attendance management platform designed to simplify tracking for both students and administrators. With a sleek dark-themed interface and intuitive navigation, it delivers real-time insights, automated alerts, and role-specific dashboards 4 all in one place.

Powerful Features

Everything you need to track and manage attendance efficiently.

Role-Based Access

Separate dashboards for students and administrators with appropriate access levels and features.

Analytics & Charts

Visual insights with pie charts, bar charts, and attendance trends to make data-driven decisions.

Smart Alerts

Automated alerts for low attendance, consecutive absences, and at-risk students.

FEATURE DEEP DIVE

Role-Based Access

AttendIQ provides tailored experiences based on user roles, ensuring each user sees only what's relevant to them.

Student View

Personal attendance records, alerts, and performance summaries.

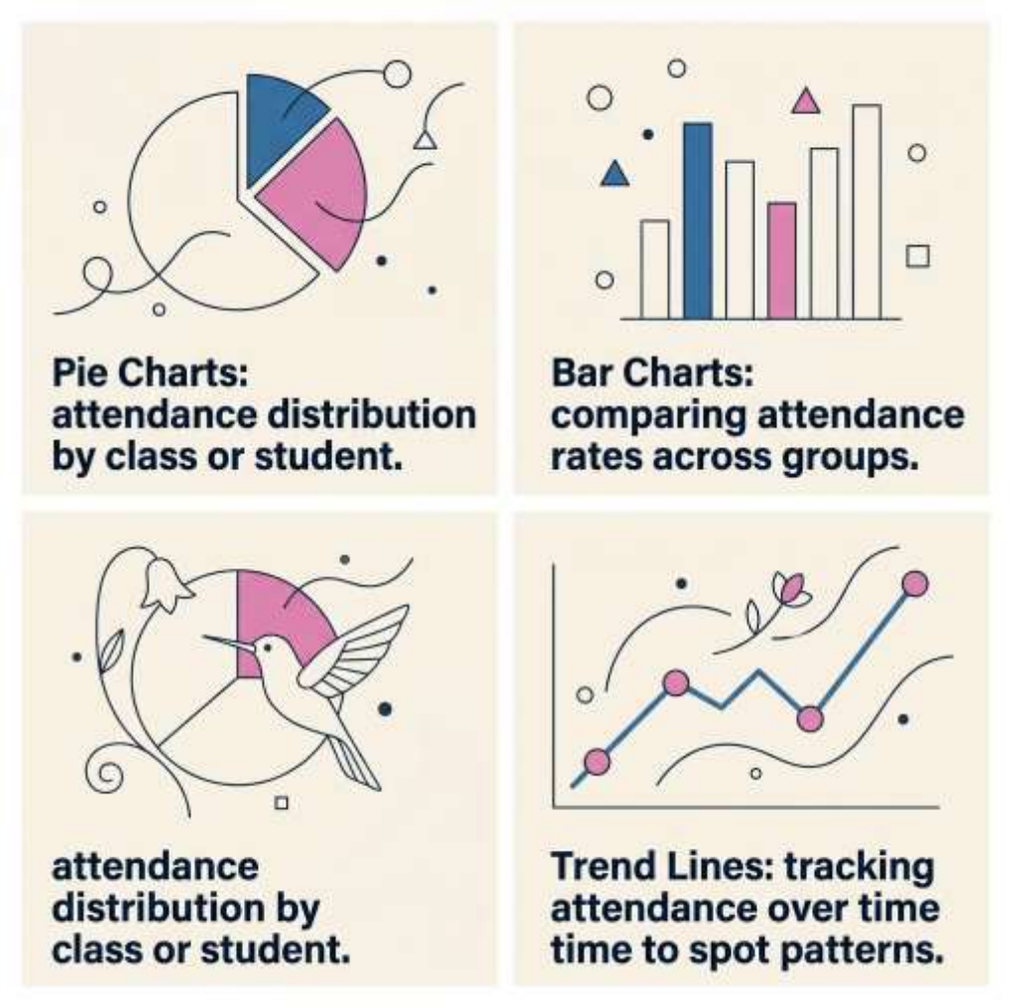
Admin View

Full system control, class management, and institution-wide analytics.

FEATURE DEEP DIVE

Analytics & Charts

AttendIQ transforms raw attendance data into clear visual insights. Pie charts, bar charts, and trend lines help administrators and students quickly understand attendance patterns and make informed, data-driven decisions.



Made with GAMMA

Get Started With AttendIQ

AttendIQ is ready to deploy and demo right out of the box. Whether you're sharing with a classmate, showcasing to a professor, or deploying for real use 4 the path is clear.

Download

Get the ZIP and explore the demo credentials.

Deploy

Share via GitHub or host live on Vercel.

Manage

Track attendance, view analytics, and act on smart alerts.
